The image shows a software dialog box titled "Event Wizard" with a close button (X) in the top right corner. Below the title bar, there is a section titled "Event Name and Type" with a circular icon of a camera. The text in this section reads: "Give this event a name and select the type of event you want Plexus to respond to. You can have Plexus perform actions based on time, when a specified X10 signal is received, when a particular file is received, or when a controller's location changes." The dialog contains several input fields: a "Name:" field with the text "Camera Motion", a "Description:" field which is empty, and a "Type:" dropdown menu currently showing "File Arrival". Below these fields is a checked checkbox labeled "Only fire this event when the controller is on this panel:" followed by a dropdown menu showing "Compaq iPaq 3650-{All Panels}-TV". At the bottom of the dialog, there are four buttons: "Cancel", "<< Prev", "Next >>", and "Finish".

Event Wizard

Event Name and Type

Give this event a name and select the type of event you want Plexus to respond to. You can have Plexus perform actions based on time, when a specified X10 signal is received, when a particular file is received, or when a controller's location changes.

Name: Camera Motion

Description:

Type: File Arrival

☒ Only fire this event when the controller is on this panel:

Compaq iPaq 3650-{All Panels}-TV

Cancel << Prev Next >> Finish
